

Quality First For Performance That Lasts

## CVMHDVR706

### Quick Installation Guide

#### Included in the box:

- |                                     |                             |
|-------------------------------------|-----------------------------|
| 1 - CVMHDVR706 Monitor              | 1 - Emergency Event Button  |
| 1 - Sun Shield Kit                  | 1 - Wireless Remote Control |
| 1 - Mounting Bracket Set            | 1 - GPS Antenna             |
| 1 - Mounting Bolt Set               | 1 - Microphone              |
| 1 - Power / Camera Harness          | 1 - WiFi Dongle             |
| 1 - 16 GB Micro SD Card (Installed) | 1 - Operators CD            |

**! Please include this Quick Installation Guide and CD with the other vehicle documentation provided to the end user.**

**1** Determine a secure and suitable mounting location for your monitor. The monitor can be mounted either overhead, on the dashboard or other suitable mounting surface.

#### **⚠ WARNING**

When routing the cable from the exterior to the interior of a vehicle, care needs to be taken to seal the entry point. Failure to do so could allow in exhaust fumes, other toxic gases or water.

Do NOT attach the wiring to any moving parts, across sharp edges or close to heat sources as this may cause shorting of the wires and may lead to a fire or electrical shock.

#### **⚠ CAUTION**

Be certain that all items are secure. Items that are not secure or mounted in an unstable manner can come loose and cause damage or personal injury.

Do NOT install the display in an area that will obstruct your forward or side visibility.

Always verify the area being drilled into is of sufficient strength and is clear of all wires and other items around or underneath so as not to cause damage.

Always confirm proper image orientation before driving or operating your vehicle. The orientation of the image displayed is critical to safe vehicle operation. An object on the right side of your vehicle needs to be seen on the right side of the display screen.

Before you begin driving, be sure the display controls are adjusted properly. This will avoid unnecessary distractions while driving.

For more detailed installation instructions or to install additional memory refer to your Operators Guide included on the CD or visit [www.intecvideo.com/support.html](http://www.intecvideo.com/support.html)  
You may also call us toll free at 800-468-3254 (West) or 800-522-5989 (East) or e-mail [support@intecvideo.com](mailto:support@intecvideo.com) with any questions. Rev A 11/2018

**2** Install the display bracket with the hardware provided. Use the bracket as a template for drilling the required holes. The recommended mounting bolt torque specification is between 15 and 17 inch pounds.

**3** Assemble the display to the bracket by aligning the "T" in the slot and hand tightening the nut and lock nut.

**4** Connect the cable harness and if desired install the sun shield by pushing it onto the monitor until locked.

## Wiring Diagram

### Monitor Connections

CVHDxxM  
Series Cable  
and CVHDC10C  
Camera

### Connections

#### Power

Red = VCC +10 to +32 VDC  
Black = Ground  
Green/Yellow = ACC +10 to +32 VDC

#### Tach

Red = Tach  
Black = Ground

#### Camera Triggers (+10 to +32 VDC)

Blue = Camera 1  
Yellow = Camera 2  
White = Camera 3  
Green = Camera 4
