

CVS500-A IP68 Series

Multi Camera Controllers

Your Car Vision CVS500-A IP68 Series Multi-Camera Controllers have been designed to meet the challenges of today's installation requirements. With heavy duty injection cast aluminum alloy cases and stainless steel mounting plates, they can be placed without concern of harsh environment. Both the H and XL versions can be mounted outside the vehicle, freeing up much needed interior space.

The combination of smart fuse and load dump circuitry protects critical components, while the back lit remote control buttons allow for easy visibility at night.

Five camera inputs and multi-screen viewing insure all critical blind spots can be monitored simultaneously, while the integrated active radar component adds an extra margin of safety.
