

## CVS100 Series

INTEC's CVS100 Series of controllers have been designed to meet the challenges of today's installation requirements. With heavy duty injection cast aluminum alloy cases and stainless steel mounting plates, they can be placed without concern of harsh treatment. The H and XL versions can be mounted outside the vehicle, freeing up much needed interior space.

The smart fuse circuitry and load dump protection protects critical components, even in the event of cable damage, and pinpoints the likely section, saving you time and money.

Processor Controlled video out allows you to record critical information or display it on an additional screen.

**CVS100M**

**CVS100XL**

Other features include back lit remote control buttons, for easy visibility at night and an integrated active radar component. Add to that, industry leading warranties and a dedicated staff ready to work with you and it's easy to see why Intec is the clear choice for your vehicle safety camera needs.

Since 1978, Intec Video Systems, Inc. has pioneered the rear vision camera industry setting the standard for others to follow. With the widest field of view available, in both color and black & white versions, operators can easily observe blind spots surrounding their vehicle. Tested to withstand all vehicle generated and environmental conditions, Intec's safety camera systems are the highest performing and longest lasting systems available. Backed by the industry's most reliable warranty, our customers benefit from the lowest total life cycle cost of ownership.
